Weather conditions can have an impact on how smoke from your burn will affect your neighbours. On days when the upper layer of the atmosphere is warmer than the air at ground level smoke, can be trapped under an inversion layer and can take a long time to disperse.

Always check with the Bureau of Meteorology to make sure they have not issued a haze alert at www.bom.gov.au and check the weather conditions in your local area.

Smoke across roads is also your responsibility, please be aware of the weather conditions on the day. You could be liable and prosecuted if the smoke emitting from your fire is a contributing factor to a traffic accident.

Be a good neighbour; always give your neighbours plenty of notice of your intention to burn. This will give them time to get the washing off the line or make arrangements for any person with respiratory issues to be relocated from the area to ensure they are not badly affected by smoke.

If a Harvest and Vehicle Movement Ban is declared it is broadcast on ABC 531 AM and via SMS.

During a Total Fire Ban or Harvest & Vehicle Movement Ban you are not allowed to light, maintain or use a fire in the open air, or carry out any activity in the open air that causes, or is likely to cause a fire.
