11.5.1 SENTINEL CHICKEN PROGRAM

FILE REFERENCE: H/INF1
REPORT DATE: 6th March 2007
OFFICER DISCLOSURE OF INTEREST: Nil
PREVIOUS MEETING REFERENCES: Nil
AUTHOR: Melissa Wilson, Mgr of Health & Regulatory Services
ATTACHMENTS: Nil

PURPOSE OF REPORT:

To consider the request from the University of Western Australia for the Shire of Moora to participate in the Sentinel Chicken Program.

BACKGROUND:

The University of Western Australia Arbovirus Surveillance and Research Laboratory coordinate the Sentinel Chicken Program. The program involves taking blood samples from flocks of chickens in the northern part of Western Australia in order to monitor the occurrence of certain mosquito borne diseases.

The program has been running since the 1980's and currently has 24 flocks of chickens placed in strategic locations in northern and central Western Australia. Blood samples are taken fortnightly during the peak mosquito season and monthly during the rest of the year. The samples are then tested for the presence of antibodies for mosquito borne diseases such as Murray Valley Encephalitis Virus and the Kunjin Virus. If the virus's are detected then the Department of Health issue warning for the area and existing mosquito prevention programs are escalated.

Murray Valley Encephalitis is a serious virus and can result in severe medical problems such as coma and respiratory failure and can cause death in some cases. Although the virus has mainly been detected in the Kimberly and Pilbara regions it has been detected as far south as Dongara and the evidence of its southerly spread is well documented.

COMMENT:

The study has shown an interest in Moora becoming a study location for the region due to its location and climate.

If the Shire of Moora were to become involved in the program it would be required to:

- Establish a flock of 12 chickens (provided by UWA) in a snake proof enclosure in a secure location near the Moora Township,
- Provide a "volunteer" to care for the chickens on a daily basis and
- Provide trained personnel to take blood samples from the chickens and arrange transportation of the samples to the laboratory in Nedlands.

The Arbovirus Surveillance Laboratory will provide the chickens and all necessary sampling equipment. They would also organise for Shire employees to be trained in the correct method for taking blood samples from the chickens.

It is intended that the Shire Ranger, Mr M Matthews, and the Manager of Health and Regulatory Services conduct the sampling. The cost to the Shire for wages to take the blood samples would counteract the existing allowable hours for the Ranger ie no additional hours will be required to be budgeted for however the hours will be allocated to different general ledger accounts.

POLICY REQUIREMENTS:

There are no known policy requirements

LEGISLATIVE REQUIREMENTS:

There are no known legislative requirements related to this item.

STRATEGIC IMPLICATIONS:

There are no known strategic implications associated with this proposal.

SUSTAINABILITY IMPLICATIONS:

➤ **Environment**

There are no known significant environmental implications associated with this proposal.

➤ **Economic**

There are no known significant economic implications associated with this proposal.

➤ **Social**

Participating in the Arbovirus Surveillance Program will provide for early detection of both the Murray Valley Encephalitis Virus and the Kunjin Virus within Moora. Not only will this assist the residents of Moora but also the monitoring program which will assist the whole state.

FINANCIAL IMPLICATIONS:

The Shire of Moora would be responsible for providing a snake proof enclosure for the 12 chickens, the cost of caring for chickens i.e. food and the wages of the employees trained to take the blood samples. The estimated time required to take the samples is two hours for two employees for each session (once a fortnight from December to June and once a month from July to November). The cost will be approximately \$1,500 in the initial year and \$1,100 in subsequent years depending on employee costs. It should be noted that the wages costs would be a part of the Rangers normal allocation of hours.

The program, if supported by Council, will need to be provided for in the 2007/08 budget process.

VOTING REQUIREMENTS

Simple Majority Required

MANEX RECOMMENDATIONS

That

- 1. Council commit to the Arbovirus Surveillance Program by:***
 - Providing a snake proof enclosure for the housing of 12 chickens,***
 - Provide food for the chickens involved in the program and***
 - Provide adequate time for Shire of Moora employees to take blood samples from the chickens.***
- 2. That the University of Western Australia Arbovirus Surveillance Laboratory be advised that the Shire of Moora will participate in the Sentinel Chicken Program.***

11.5.2 TENDER NO 7/2006 – REVIEW OF MOORA FLOOD MANAGEMENT PLAN

FILE REFERENCE: LO/FLMI
REPORT DATE: 8 March 2007
APPLICANT/PROPONENT: Shire of Moora and Department of Water
DISCLOSURE OF INTEREST: Nil
PREVIOUS MEETING REFERENCES: 13 December 2006 (261/06)
AUTHOR: Steven Deckert, Chief Executive Officer on behalf of the Tender Assessment Panel
ATTACHMENTS: 1. Assessment of Tenders conformity
2. Assessment of tenders received against selection criteria
3. The tender documents submitted by the five tenderers, which are confidential, will be tabled at the Council meeting.

PURPOSE OF REPORT:

The purpose of this report is to present to Council the outcome of the Tender Assessment Panel's deliberations and to consider the acceptance of the Panel's recommendation of the preferred tenderer.

BACKGROUND:

At the Ordinary meeting of Council held in December 2006, Council resolved to call tenders for the appointment of a consultancy to carry out a review of the Moora Floodplain definition study.

The tenders closed on 15 January 2006 with 5 tenders received. Since the close of tenders, the tenders received have been assessed to determine conformity to the Request For Tender specifications and assessed against the selection criteria.

Attached to this report is the summary of the assessment of conformity of the tenders received against the requirements of the tender documentation. In all cases there were varying degrees of non-conformity, however the Tender Assessment Panel were of the opinion that the non-conformances were not significant enough to reject the tenders, and could in fact be clarified and easily resolved with the preferred tenderer.

The Department of Water initially conducted a review of the tenders received for their technical capabilities and their understanding of the requirements of the tender.

Finally the Tender Assessment Panel comprising Mr Peter Muiridon from the Department of Water and Cr Jim Pond and the CEO, met on Wednesday 7 March 2007 to assess the tenders received against the selection criteria as determined by Council. The tenders were scored against the selection criteria based on the tenders submitted. The tender with the highest score as a result of this process is considered to be the most advantageous tenderer to complete the review of the floodplain plan.

A copy of the summary of the scoring of the tenders is appended for Council's information.

The Tender Assessment Panel recommends that the tender be awarded to the highest ranked tenderer being Sinclair Knight Merz (SKM) at the maximum tendered price of \$105,972 (excl GST).

COMMENT:

In assessing the conformity of the tenderers received, all tenders submitted “estimated” tender prices. This was due to the need to sub-contract the aerial survey work, which accounted for around \$70,000 of the total amount in all cases. Apparently it has been difficult to obtain fixed costs from the sub-contractors for various reasons. The Tender Assessment Panel has therefore assumed that the tendered price is the maximum amount and may be less if the aerial survey work is less than estimated.

Another aspect for Council to consider in respect to this tender is that the total tendered price of the proposed tenderer is \$105,972, which greatly exceeds the budget provision of \$45,000. The Department of Water has advised that they can increase their contribution to \$50,000, the Federal Government contribution remains at \$15,000; therefore Council’s commitment will increase from \$15,000 to \$40,972.

The Tender Assessment Panel is of the view that the outcomes of the review of the Floodplain Plan are extremely beneficial and therefore endorse the additional expenditure. The additional amount of \$25,972 does not need to be found in this year’s budget, as the project will not be finalised until the 2007/08 financial year. This means that if Council agrees to award the tender, the balance of funds can be budgeted for next year.

POLICY REQUIREMENTS:

There are no policy implications in respect to the recommendation of this report.

LEGISLATIVE REQUIREMENTS:

Sections 2.7 and 3.1 of the Local Government Act 1995, relating to the general function provisions.

S3.57 of the Local Government Act 1995, requires a local government to call tenders for the provision of goods and services where the value is likely to exceed \$50,000 and Part 4 of the Local Government (Functions and General) Regulations 1996 provides the detail that Council must comply with when tendering.

STRATEGIC IMPLICATIONS:

The future of the Moora Townsite is largely impacted by the likelihood of further flooding. Any initiatives that can be undertaken to mitigate the possible effect of flooding need to be identified and pursued. The development of a plan that clearly defines the flood prone areas is the first step towards understanding the extent of mitigation works required that improve the safety of people and property and also provides a defensible tool in assessing future development proposals.

SUSTAINABILITY IMPLICATIONS:**➤ Environment**

The outcomes of the review of the Moora Floodplain Plan will provide a mechanism that will enable Council to better manage the built and natural environment within the Moora townsite.

➤ **Economic**

The outcomes of the review of the Moora Floodplain Plan will provide a mechanism that will enable Council to make better informed decisions in relation to development within the Moora townsite.

➤ **Social**

Property owners within the Moora townsite and future property owners will have a better understanding of flood management in Moora and how to deal with future flood events.

FINANCIAL IMPLICATIONS:

There are no financial implications to Council in relation to this recommendation, however an amount of \$25,972 will need to be provided for in the 2007/08 Budget.

VOTING REQUIREMENTS:

Simple Majority required

MANEX RECOMMENDATION

That Council award Tender 7/2006 Provision of a Consultant to Review Floodplain Definition Study to Sinclair Knight Merz for the maximum tendered price of \$105,972 (excl GST).
